

AKHIL REDDY APURI

+1(475) 227 7656 | akhilapuri17@gmail.com

PROFESSIONAL SUMMARY

Data Analyst with 4 years of experience delivering business intelligence solutions, KPI reporting, dashboard development, and self-service analytics for enterprise reporting environments. Strong expertise in Sigma Computing, SQL, Snowflake, Tableau, data modeling, and reporting analytics. Experienced in building reporting datasets, developing executive dashboards, defining business metrics, and transforming complex data into actionable insights that support operational and strategic decision-making.

TECHNICAL SKILLS

Programming	: SQL, Python, Java, R, JavaScript, TypeScript.
Data Engineering	: ETL/ELT Pipelines, Data Ingestion, Data Modeling, Data Validation, Data Quality Checks, Reporting Data Pipelines.
BI & Reporting	: Sigma Computing, Tableau, KPI Dashboards, Executive Reporting, Ad-hoc Reporting, Self-Service Analytics, Data Visualization, Business Intelligence Reporting
Data Warehousing	: Snowflake, AWS Redshift, PostgreSQL, MySQL, OLTP/OLAP Modeling, Schema Design, Reporting Data Marts.
Analytics	: SQL Analytics, KPI & Metrics Development, Data Analysis, Reporting Datasets, Dashboard Enablement.
Cloud & DevOps	: AWS (S3, EC2, Redshift), Docker, Kubernetes, Jenkins, CI/CD Pipelines, Git/GitHub, Linux/Unix.
Application Development	: Spring Boot, REST APIs, Microservices, React.js, Node.js
Testing & Quality	: Data Validation, Unit Testing, Integration Testing, Data Quality Monitoring.
Other Skills	: Agile (Scrum), SDLC, OOAD, Operating Systems, Stakeholder Management, Requirements Gathering, Business Analysis.

PROFESSIONAL EXPERIENCE

Local Grown Salads

United States

Data Analyst

June 2025 – Present

- Designed and maintained reporting datasets by integrating 5+ business data sources and transforming raw operational data into analytics-ready models. Supported KPI reporting, dashboard development, and self-service analytics for business stakeholders.
- Developed interactive dashboards, executive reports, and KPI scorecards using SQL, Sigma Computing, and Tableau. Enabled users to monitor operational performance, business metrics, and key trends through centralized reporting solutions.
- Collaborated with business stakeholders to gather reporting requirements, define KPI calculations, and create analytics-ready data models. Delivered actionable insights that improved visibility into operational performance and supported data-driven decision making.
- Optimized reporting queries, dashboard datasets, and data validation processes to improve reporting accuracy and performance. Ensured reliable data delivery, governance compliance, and consistent reporting across production environments.

University of North Carolina at Charlotte

Charlotte, NC

Data Analyst

Aug 2024 – May 2025

- Developed reporting datasets and analytics solutions supporting high-volume academic data, enabling Sigma Computing dashboards, Tableau visualizations, and operational reporting. Improved reporting performance by 35% through SQL optimization and data modeling techniques.
- Built executive dashboards, KPI scorecards, and self-service reporting solutions to support institutional stakeholders. Delivered actionable insights through Sigma Computing workbooks, business intelligence reporting, and data visualization best practices.
- Collaborated with business users to gather reporting requirements, define KPI metrics, and develop analytics-ready data models. Supported dashboard development, ad-hoc reporting, and performance monitoring across multiple academic functions.
- Performed data validation, reporting quality assurance, and dashboard performance optimization to ensure accurate and reliable reporting. Improved data quality, reporting consistency, and stakeholder adoption through governance and reporting standards.

Ceremorphic

Hyderabad, India

Data Analyst

Nov 2022 – Jul 2024

- Designed and developed reporting-ready datasets, KPI metrics, and analytical data models to support Sigma Computing dashboards and business intelligence reporting. Enabled stakeholders to track operational performance and key business indicators through self-service analytics.
- Created ad-hoc reports, executive dashboards, and interactive visualizations using Sigma Computing, SQL, and Tableau. Delivered actionable insights and trend analysis that improved reporting efficiency and business decision-making.
- Collaborated with business users to gather reporting requirements, define KPI calculations, and translate business needs into scalable reporting solutions. Developed analytics-ready data structures supporting dashboarding, operational reporting, and performance monitoring.
- Optimized SQL queries, reporting datasets, and dashboard performance while implementing data quality and validation controls. Improved reporting accuracy, reduced data inconsistencies, and ensured reliable reporting across production environments.

EDUCATION

University of North Carolina at Charlotte, Charlotte, NC

Aug 2024 – Dec 2025

Master's in Computer Science

CGPA : 3.9/4

- Relevant Courses:** Data Structures and Algorithms, Artificial Intelligence, Software System and Design Implementation, Visual Analytics, Database Systems, Big Data Analytics, Data Mining, Computer Communication & Networks.

PROJECTS

VISUAL ANALYTICS REPORTING PROJECT | Tableau, SQL, Data Visualization, KPI Reporting

- Prepared, cleansed, transformed, and validated large datasets to create analytics-ready reporting models. Performed data profiling, data quality checks, metric standardization, and business rule validation to support accurate reporting and dashboard development.
- Designed and developed interactive dashboards, KPI scorecards, executive reports, and performance monitoring solutions using Tableau. Utilized calculated fields, derived metrics, filters, parameters, and drill-down capabilities to deliver meaningful business insights.
- Developed business metrics, analytical scoring models, and reporting dimensions based on stakeholder requirements and key performance indicators. Built self-service analytics solutions enabling ad-hoc reporting, trend analysis, and data-driven decision making.
- Delivered actionable insights through business intelligence reporting, data visualization, and dashboard optimization techniques. Presented performance trends, operational metrics, and executive-level reporting views to support strategic planning and operational improvements.
